# Innovative, market leading conversions.

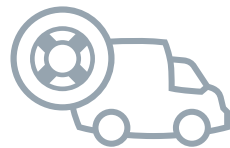

## COMPLIANCE

**Leave it to us.** It is our responsibility to ensure that all vehicles are absolutely fit for purpose and meet the highest operational, safety, environmental and legislative requirements including:

- ECWVTA (European Community Whole Vehicle Type Approval) and
- NSSTA (National Small Series Type Approval)
- IVA (Individual Vehicle Approval)
- EN 1789 European Safety Standard for ambulance conversions

**With more than 60 years conversion and bodybuilding experience, The Cartwright Group provides an industry leading end-to-end service.** Whether you are looking for an existing specification or require a completely bespoke solution, we will work with you from initial enquiry to long after you take delivery of your vehicle – customer service is at the heart of everything we do.

All our conversions are designed by industry leading engineers and manufactured in-house by an experienced team of Cartwright trained technical specialists. Our attention to detail is reflected in the quality of build, safety of application and long-term reliability of our wide-ranging products. We have adopted a flexible approach to manufacturing which includes a software planning application that optimises production whether it's a single vehicle or a large fleet requirement.

# Quality.

## **Our Built in Britain promise enables us to maintain quality controls throughout the entire design, build and conversion**

**processes.** In addition to VCA Conformity of Production (COP) – which evidences the ability to produce a series of products that exactly match the specification, performance and meeting requirements as outlined in the type approval documentation, and ISO9001 certification - which recognise consistency of quality, design and production, we apply our own rigorous quality checks to ensure every vehicle produced by Cartwright Conversions conforms to the highest industry standards before it is signed-off and presented to the customer.

The OEM vehicle models, materials and components used in the build and conversion processes are chosen for their performance and durability. All Cartwright Conversions are designed and manufactured for maximum longevity and reliability, which adds value for our customers by saving them money throughout the life of the vehicle.

## After sales support.

**We know that all vehicles leaving our factory are of the highest standard and reliability,** furthermore we offer on-going support including a complete-peace-of-mind 12 months, nationwide after sales warranty as standard. Additional warranty options are available from two years through to the full operational life of the vehicle.

Pre and post vehicle delivery home visits are offered to all of our Wheelchair Accessible Vehicle customers, where we discuss and agree the right choice of vehicle specification, provide a full vehicle overview and a comprehensive demonstration, making the whole experience as relaxing, informative and enjoyable as possible.

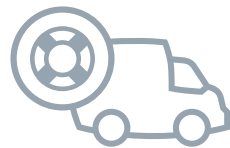

# Market leading, ambulance conversions.

## AMBULANCE CONVERSIONS

- Frontline A&E (accident and emergency)
- RRV/FRV (rapid/fast response units)
- High Dependency Ambulances
- Neonatal/Paediatric Ambulances
- PPV (Paramedic Practitioner Vehicle)
- ECP (Emergency Care Practitioner)
- Control Vehicles
- Special Incident Units
- Mountain Rescue Vehicles
- PTS (Passenger Transport Service)
- Specialist and Custom Applications

**Our market leading emergency vehicle conversions** are the result of many years' experience and commitment in this sector. Each vehicle is built on an OEM chassis of choice, it is designed and manufactured to meet the precise needs of the emergency services.

Our frontline and rapid response units are our most advanced emergency vehicles, providing vital transport and urgent medical attention while the patient is in transit and on route to hospital. The exact specification is modified to match and conform to the specific requirements of the emergency services as well as the latest advances in medical care.

AMBULANCE

# Mobility vehicles designed and built for the individual.

## WHEELCHAIR ACCESSIBLE VEHICLE WAV OPTIONS

- Family requirements catered for
- Choice of chassis
- Home visits pre & post vehicle delivery
- All budgets catered for

All Cartwright Wheelchair Accessible Vehicle (WAV) Conversions are designed and built specifically with the individual in mind. The choice of base vehicle model is wide and varied to suit all budgets and needs, covering compact to multi-seater vehicles and includes options from all well-known OEM brands. Using our vast experience and wide ranging knowledge, we guide and support our clients through the assessment, adaptation, conversion and handover process to ensure the vehicle perfectly matches their needs, with continued support thereafter. Whether its wheelchair, swivel seat or grab rail access that's required, we work with the original equipment suppliers to ensure the highest quality and safety approved options are fitted to the vehicle.

Reliability and safety are key priorities and all Cartwright Mobility Vehicles have to pass rigorous safety and performance assessments, including crash testing to the highest industry standards, before they are handed over to the customer.

MOBILITY

# Custom built conversions for ultimate policing and security.

## SECURITY CONVERSIONS

- Response Vehicles
- Traffic Vehicles
- Support Units
- Single and Multi-Cell Custodial
- Dog Units
- Discreet Protection
- Cash-in-Transit
- Mobile Banks

Providing vehicles for all Police applications we work closely with the authority to ensure compliance and operational functionality. Cash-in-transit, custodial and mobile banks are popular models in our Security range of conversions. As part of our end-to-end service we recommend the best chassis or vehicle to convert based on payload, height and length requirements, we then complete the conversion to an agreed specification, including differing levels of security and protection to best suit the job in hand. All vehicles comply with the determined level of security and threat potential which can be enhanced to include sophisticated security features and ultimately increase security levels.

# Designed for your workforce or application.

## WELFARE CONVERSIONS

### ACCESSORIES FITTED AS STANDARD

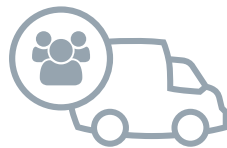

- Fire extinguisher, first aid kit, eye wash station
- Storage area for tools, consumables and work wear
- Motion sensing LED lighting
- Reverse alarm
- Side and reverse cameras with infra-red sensors for night driving
- Two exterior light beacons
- Rear gripper step with standard reversing sensors and tow bar
- Twin USB charging point

Upgrades to the standard welfare vehicle include an event data recorder, side entry door-step or a 240v power source for laptops, fridges and drying locker etc.

**Cartwright Welfare Vehicles are designed with your workforce and application in mind, offering comfort, safety and flexibility.** We work with our customers to design and build a vehicle that meets their exact needs of operational requirements.

Depending on your chosen specification, you have the choice of many on-board comforts, including heating, microwave, water heater (for hot drinks), electric flush toilet and a latest technology sink that optimises hygiene and minimises waste.

**Our vehicle racking systems are designed to cover all applications** whether you want steel for longevity, aluminium for payload consideration or an innovative mobile solution that can be fitted and removed from your vehicle in seconds. Our in-house design software allows us to prepare a unique solution to maximise the space in your van while at the same time improving on both user safety and efficiency. Whether you're looking for a workshop, an effective storage space or a mobile system, we have it covered.
