- Hire fleet of PTS Ambulances

AMBULANCE

Simple and efficient designs, giving operational ease for the users and essential comfort to the occupants.

Optional loading solutions, patients can be assisted onto the vehicle using a tail-lift or loading ramp aided by a suitably load rated winch.

Tested floor system, allowing flexible interior seat, stretcher and wheelchair location arrangements meaning we can tailor the interior to your exact specification.

Variety of base vehicles, we offer conversions on a range of suitable vehicle makes/models and wheelbases to suit the specific requirements of the customer.

Unaided patient entry, folding side door hand rails protruding outside the vehicle assist entry by the less able resolute patients.

Peace of mind, comes from using one of the UK's largest vehicle bodybuilders and manufacturers that offer a first rate service and are trusted to deliver.
