a cartwright group company

.....
WELFARE CONVERSIONS
.....

- Meets Type Approval standards
- Lightweight design with extra storage
- Side and reverse camera as standard

WELFARE+RACKING

.....

Designed to give your workforce a safe place to retreat in challenging and remote conditions.

WELFARE CONVERSIONS

Must-have accessories fitted as standard:

- Reverse alarm
- Two exterior light beacons
- Side and reverse camera
- Rear gripper step and towbar
- Storage area for a bin and consumables
- Fire extinguisher, first aid kit, eye wash station

WELFARE+RACKING

The vehicle comes with seven seats as standard and you can choose to add a tip-up seat to safely accommodate an eighth passenger. With a simplified on-board heating system this conversion is lighter and has more load space. It includes a seating area with table, on-board heating and lighting, hand wash facilities, a food preparation area and the option to have a toilet or racking in the rear.

Your conversion comes with a 25 litre cassette toilet with electric flush and a sink with an automated tap for the ultimate hygienic hand wash solution. The new auto-sensor tap is included as standard on all our welfare vehicles to help you save water and stop the spread of germs.

This conversion meets Type Approval standards and is available across a range of van models. Your safety is our top priority so you can rest assured that all of the products in your vehicle conversion are e-marked and the seats have been crash tested to high standards.
